

# Most used programming languages among developers worldwide, as of early 2020

## Job Market:

According to Indeed, Python is the most demanding programming language in the USA job market, with the highest 74 K job posting in January 2020. Also, Python ranked third with a \$120 K yearly salary.

Also, StackOverflow developer survey has shown that Python developers earn a high salary with relatively low experience compared to other mainstream programming languages:

### Salary and Experience by Language
